### PROFESSIONAL SUMMARY

---

Salesforce Developer with hands-on project experience in Apex, Apex Triggers, SOQL, SOSL, Lightning Web Components (LWC), Apex Test Classes, Salesforce CLI, Git, and Salesforce DX. Built Salesforce automation using Trigger Handler Pattern, bulk-safe DML, collections, custom objects, relationships, validation logic, and parent-child LWC communication. Brings 7 years of business operations experience in customer handling, issue resolution, process ownership, and stakeholder communication, with a strong focus on clean Salesforce development and client-ready delivery.

### CORE SALESFORCE SKILLS

---

**Salesforce Development:** Apex, Apex Triggers, Trigger Handler Pattern, SOQL, SOSL, DML, Governor Limits, Bulkification, Test Classes, Code Coverage

**Lightning Web Components:** LWC, JavaScript, HTML, CSS, @wire, Imperative Apex, Custom Events, Parent-to-Child Communication, Child-to-Parent Communication

**Salesforce Administration:** Custom Objects, Custom Fields, Page Layouts, Record Relationships, Validation Rules, Flows, Object Manager, Security Basics

**Tools:** Salesforce CLI (SFDX), Salesforce DX, VS Code, Git, GitHub, Change Tracking, Deployment Basics

### SALESFORCE PROJECT EXPERIENCE

---

#### Salesforce Recruitment Management System | Salesforce Developer Project | 2026

Technologies: Apex, Apex Triggers, LWC, SOQL, SOSL, Salesforce CLI, GitHub

GitHub: [github.com/mukeshbinu007-spec/Salesforce-Recruitment-Project](https://github.com/mukeshbinu007-spec/Salesforce-Recruitment-Project)

- Designed and implemented Apex Trigger and Trigger Handler logic to automatically create Interview records from Job Application submissions.
- Built business logic to update Job Application status to Hired or Rejected based on related Interview outcomes.
- Developed Lightning Web Components to display Job Application data from Apex controllers using @wire and imperative Apex calls.
- Wrote bulk-safe SOQL queries using Maps, Sets, and Lists to reduce governor-limit risk during DML operations.
- Created Apex Test Classes with positive, negative, and bulk test scenarios to validate trigger and handler behavior.

#### Salesforce Standard Object Automation Practice | Salesforce Developer Project | 2026

Technologies: Apex, Apex Triggers, SOQL, Test Classes, Standard Objects

- Built Contact-to-Account automation to update the Latest Contact Email field on the parent Account in real time.
- Implemented Opportunity amount rollup automation to maintain aggregate totals on related Account records.
- Covered automation scenarios across Account, Contact, Case, Lead, and Opportunity using Trigger Handler architecture.
- Wrote Apex Test Classes for bulk data scenarios and maintained more than 75% code coverage.

### WORK EXPERIENCE

---

#### Operations Manager | Bajaj and TVS Spare Parts Distributorship | Gurgaon | 2017-2024

- Managed daily business operations, customer communication, order tracking, inventory coordination, and issue resolution.
- Worked directly with customers, vendors, and internal stakeholders to resolve operational problems with minimal escalation.
- Developed strong process discipline, documentation habits, ownership mindset, and client communication skills relevant to Salesforce consulting and development roles.

### EDUCATION

---

Bachelor of Business Administration (BBA), LNCBM, Muzaffarpur | 2014 | 78%

### TRAINING AND CERTIFICATIONS

---

- Salesforce Development Training: Apex, Apex Triggers, LWC, SOQL, SOSL, Test Classes, Trigger Handler Pattern, and practical project implementation.
- Salesforce Administration Practice: Custom objects, fields, page layouts, relationships, validation rules, flows, and automation basics.
- Salesforce Platform Developer I (PD1): Actively preparing.
